

Making a burse with edge trim

- 1 Back face pieces with iron-on interfacing.
2. Turn front piece, interfacing up and find center of the piece. Mark the center lines vertically and horizontally.
3. Measure and mark lines 4 ½" from the center line on each side.
4. Transfer markings to the right side of the front piece by machine basting along the 4 ½" lines all around.
5. On the right side lay outside edge of the galloon along the machine basting beginning on the bottom hinge edge of the burse. Stitch.
6. Stitch the linen lining along the top edge of the burse pieces 1/8" from galloon. (Note: the straight of grain or pattern of the burse should be parallel to the burse opening. The opening should be on the right when facing you.)
7. Stitch the sides 1/8" from the galloon. On the back pieces proceed as usual.
